Whiteside east of Raymond-Mar 25-27 2013.xls	820	vpd

vpd = vehicles per day - 2 way

Carey Local Area Plan (LAP) Road Network - Map 11.1

Major roads in Carey LAP include **Carey Road**, Wilkinson Road, Helmcken Road, Burnside Road west of McKenzie Avenue, **Tillicum Road**, Glanford Road and Vanalman Avenue between Glanford Road and Pat Bay Highway.

Major roads are intended to accommodate internal and intermunicipal travel.

Collector roads are intended to disperse traffic from residential streets onto major roads. The **collector** network in Carey LAP provides good north-south connections to the community. East-west connection is more circuitous with Mann Avenue, Vanalman Avenue, Roy Road – Judah Street, **Columbine Way** and **Interurban Road** being the primary links.

The **residential** road network in Carey is established and no major extensions are planned, with the exception of new development in the Wilkinson valley. These roads provide direct access to residential property and are used as pedestrian routes.

Notes: Transportation Association of Canada (TAC) Guidelines for Urban Roads
Major Arterial roads typically carry 10,000 - 30,000 vehicles per day (vpd)
 Minor Arterial roads typically carry 5,000 - 20,000 vehicles per day (vpd)
Collector Roads typically carry 1,000 - 12,000 vpd
Residential or Local roads can carry up to 3,000 vpd
